PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building enterprise-grade web applications using **.NET, Azure Cloud, and Angular**. Proven expertise in architecting event-driven microservices, real-time WebSocket messaging systems, and dynamic workflow engines. Strong foundation in distributed backend systems, database performance tuning, and modern frontend development across healthcare and SaaS domains.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, Java, SQL

Frontend: Angular 15+, React, RxJS, HTML5, CSS3, DevExtreme, PrimeNG

Backend: .NET 6+, Node.js, Express.js, Azure Functions, MediatR (CQRS), RESTful APIs

Cloud & DevOps: Azure (Service Bus, SignalR, Key Vault, Blob Storage, Redis), CI/CD Pipelines

Databases: PostgreSQL, MongoDB, Entity Framework Core, Dapper, Redis Caching

Developer Tools: Git, GitHub, Azure DevOps, Postman, VS Code, SendGrid API

PROFESSIONAL EXPERIENCE

Junior Software Developer

PixelMind Technology

Sep 2025 – Present

Mumbai, India

- Architected an **event-driven notification microservice** using CQRS pattern (**MediatR**), **Azure Service Bus**, and **SendGrid API**, processing high-volume daily communications across multi-tenant clients.
- Developed a **real-time in-app notification engine** utilizing **Azure SignalR Service** and WebSockets, incorporating **RxJS** state management, auto-reconnection logic, and offline polling fallbacks.
- Built a customizable **WYSIWYG email template editor** using DevExtreme and Quill.js, enabling multi-language rendering and **Azure Blob Storage** integration for template versioning.
- Engineered an automated **scheduled reminder engine** backed by **Azure Functions** timer triggers and cron scheduling with status tracking and exponential retry logic.
- Developed a **Claim Correction Tool** for the healthcare domain featuring automated claim validation workflows, **Azure Key Vault** for secure PHI data encryption, and Redis caching.
- Built a **Network Lifecycle Management Platform** to automate hardware replacement alerts, firmware updates, and SSL certificate expiry tracking using Azure Timer Functions.
- Implemented granular **Role-Based Access Control (RBAC)** with dynamic permission matrices and dynamic PostgreSQL column rendering for tenant-specific views.
- Optimized high-traffic database operations through query tuning, indexing, and **Redis caching**, reducing application response times.

Software Development Intern

PixelMind Technology

Mar 2025 – Sep 2025

Mumbai, India

- Supported backend service development using C# .NET Core and Azure cloud platform under senior engineering mentorship.
- Integrated core cloud capabilities including Azure Functions, Service Bus, Key Vault, Redis Cache, and Storage Queues.
- Resolved critical bugs and developed user-facing features for enterprise clients in healthcare and infrastructure domains.

Full Stack Web Developer Intern

Unified Mentor

Jan 2025 – Mar 2025

Remote

- Completed a full-stack engineering program, building web applications with the **MERN stack** (MongoDB, Express.js, React, Node.js).
- Implemented RESTful APIs, decoupled frontend component architectures, and managed version control workflows with Git.

EDUCATION

Patkar Varde College

Bachelor of Science in Information Technology

Graduated: 2024
CGPA: 9.02 / 10.0

CERTIFICATIONS

- MERN Stack Development Certification — 2024
- Robotic Process Automation (RPA) Certification — 2023
- Citi ICG Technology Software Development — Forage (2025)
- Tata Cybersecurity Analyst — Forage (2025)
